

# Opportunity for Nurse Practitioner in emerging latitude

**Heng-Hsin, Tung(Shannon)**

**PhD, RN, FNP, Professor**

**Institute of Clinical Nursing, School of Nursing,  
National Yang-Ming University**

**Vice president of Taiwan Association of Nurse  
Practitioner**

# Background

---

“

- The demographic structure and disease patterns of the population of Taiwan have changed
- There is a need to expand community services.
- There is a limited number of healthcare personnel who can provide the needed community healthcare services.

”

# Purposes

---

## Develop

---

**FNP** transition program in Taiwan

## Compliance

---

Scope of NP practice in Taiwan

## Internationalize

---

International compatible

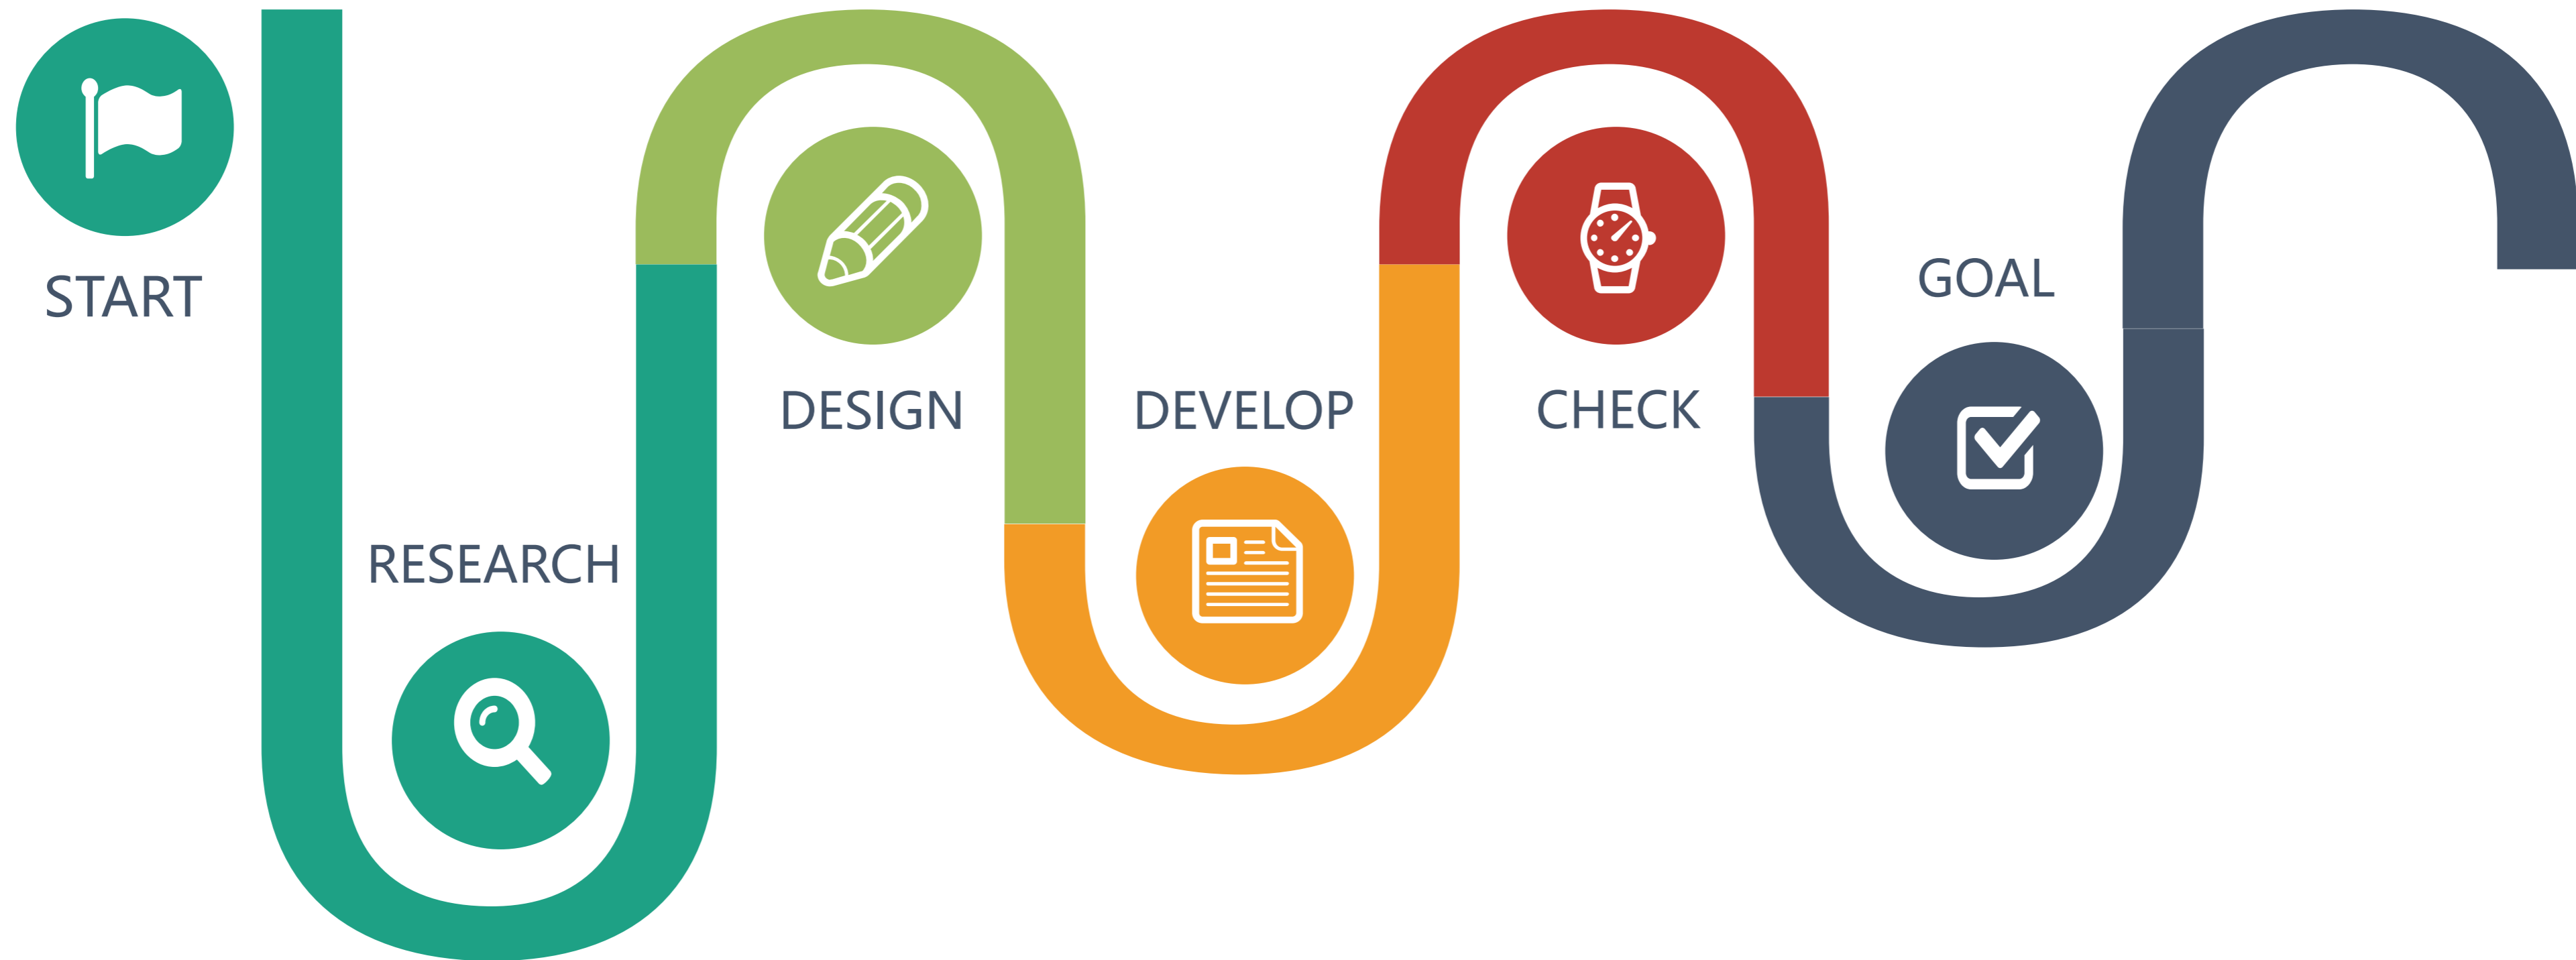

## Validate

---

**FNP** transition curriculum

# Method

Conduct a gap analysis through a review of the literature and current community care as well as by collecting workforce data.

Develop an FNP transition program in line with scope of NP practice in Taiwan

Use the Delphi method to examine the quality of the program as well as meet international standards.

Conduct a pilot program, and revise the program as needed.

# Outcomes

---

A global-localized NP transition program will have a positive impact on Taiwanese society and on the international community.

The program will reduce the gap between supply and demand as well as expand the various settings of NP care to achieve better quality of care.

# Stakeholder and Our team
